Director, Citrus Experiment Sta.  
University of California  
Riverside  
California

Dear Sir:

In connection with our own studies on the genetics of resistance in bacteria. I would be most interested to obtain as recent information as possible on the work that has been done in your Station on resistance to fumigation in scale insects. The most recent publication for which I have been able to find a reference concerns the work of Dixon in 1941 as published in Hilgardia.

Can you direct me to any more recent work on this subject?

I would also be most grateful for any reprints that may still be available on these experiments.

Yours sincerely,

Joshua Lederberg,  
Associate Professor of Genetics
